NOTES TO FINANCIAL STATEMENTS**Note 1 – Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The accompanying financial statements of United Guaranty Residential Insurance Company of North Carolina (the "Company") are presented on the basis of accounting practices prescribed or permitted by the North Carolina Department of Insurance (the "Department").

The Department recognizes only statutory accounting practices prescribed or permitted by the state of North Carolina (the "State") for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the North Carolina insurance law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State.

There are no changes in surplus in the accompanying financial statements due to differences between the state of North Carolina prescribed accounting practices and those of the NAIC. Reconciliations of net income and policyholder's surplus between the amounts reported in the accompanying financial statements (NC Basis) and NAIC SAP follow:

B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these financial statements and notes. Actual results could differ from these estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed based on North Carolina statutory requirements.

Expenses incurred in connection with acquiring new insurance business, including acquisition costs associated with underwriting and sales related activities, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the company uses the following accounting policies:

- (1) **Basis for Short-Term Investments**
The Company considers all highly liquid debt securities with maturities of greater than three months but less than twelve months from the date of purchase to be short-term investments. Short-term investments are carried at amortized cost which approximates NAIC market value (as designated by the NAIC Securities Valuation Office).
- (2) **Basis for Bonds and Amortization Schedule**
Bonds, loan backed and structured securities ("LBaSS") with an NAIC designation (as obtained from the NAIC Investment Analysis Office ("IAO")) of "1" or "2" (considered to be investment grade) are carried at amortized cost. Bonds and LBaSS with an NAIC designation of "3", "4", "5", "5*", "6" or "6*" (considered to be non-investment grade) are carried at the lower of amortized cost or fair value. LBaSS fair values are determined using independent pricing services and broker quotes. Bonds and LBaSS that have not been filed and have not received a designation in over a year, from the NAIC IAO, are assigned a 6* designation and carried at zero, with unrealized losses charged to surplus. Bond and LBaSS securities that have been filed and received a 6* designation can carry a value greater than zero. Bond and LBaSS securities are assigned a 5* designation when the following conditions are met: a) the documentation required for a full credit analysis did not exist, b) the issuer/obligor has made all contracted interest and principal payments, and c) an expectation of repayment of interest and principal exists. Amortization of premium or discount on bonds and LBaSS is calculated using the effective yield method.

Additionally, mortgage-backed securities and asset backed securities prepayment assumptions were obtained from an outside vendor or internal estimates. The retrospective adjustment method is used to account for the effect of unscheduled payments affecting high credit quality securities, while securities with less than high credit quality and securities for which the collection of all contractual cash flows is not probable are both accounted for using the prospective adjustment method.
